

# MEDIUM X2

## THE ALLROUNDER

### ADVANTAGES

Larger hopper volume

The right body for all applications

Hydraulic concept designed for energy efficiency and modular control system, already future-orientated for alternative drives

Variable body concept in length, width & height

## ABOUT THE MEDIUM X2

The all-rounder with optimised body volume and large hopper offers a usable volume of 21 to 24 m<sup>3</sup> as standard, up to 30m<sup>3</sup> for special applications – and in the MEDIUM X2H version with a 200 millimetre higher body and the same vehicle length, even a volume

of up to 31 m<sup>3</sup>. This is perfect for collection in areas with wide access roads and a high proportion of 4-wheel containers. The refuse fraction can be set on the control terminal: Recyclables, residual waste, biowaste and paper are compacted at the optimum pressure – glass is

also available on customer request. Also ideal for the collection of recyclables in bags.

## SERIES OPTIONS

### BASIC CONSTRUCTION:

- X2H: Body raised by 200 mm
- X2L: Body reduced by 200 mm
- Closed or open tailgate
- Clean Option

### USE IN COMBINATION WITH:

- High-level lifter, low-level lifter and commercial lifter

## AREAS OF APPLICATION

FOR OPEN  
LOADING

RESIDUAL  
WASTE

PAPER,  
PAPERBOARD,  
CARTON

INDUSTRIAL &  
COMMERCIAL  
WASTE
