

THE CRANE VEHICLE

FOR ALL THOSE WHO
WANT TO AIM HIGH

ADVANTAGES

Different versions with
front crane, roof crane or
rear crane

Separate
hydraulic circuit

Remote radio control
for crane and
superstructure

Can be integrated into
waste collection vehicle
Medium X2

ABOUT THE CRANE VEHICLE

Even today, urban planners are increasingly designing residential complexes where waste disposal is handled by much larger underground depots instead of traditional 2- or 4-wheel waste bins. The systems, which are only visible from

above through flaps, can be picked up with a special crane vehicle. Instead of the lifter, a fixed, swivelling or folding chute with a capacity of approx. 4 m³ is located at the rear of the vehicle. Ideal in combination with the MEDIUM X2LC.

SERIES OPTIONS

FEATURES:

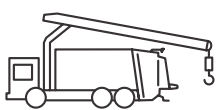

- Variable swivelling funnel
- Fixed funnel
- Swivelling funnel for the integration of low level lifters
- Hopper-integrated manual throw flaps manually or hydraulically operated
- Hydraulic stabilizers

USE IN COMBINATION WITH:

- All crane manufacturers

CRANE OPTIONS

FRONT CRANE

ROOF CRANE

REAR CRANE
