

OMEGA 359

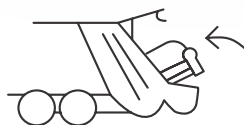

FOR TOURS THAT REQUIRE CUSTOMISED WORK

ADVANTAGES

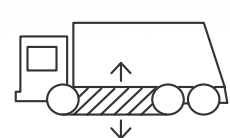

Manual lifting comb

Integrated inner rake, suitable for use with bulky waste

Fold-out operating unit for container pick-up in one-man operation

Folding container support for more ground clearance

ABOUT THE OMEGA 359

The continuous manual lifting comb can pick up 2-wheel and 4-wheel containers, the tipping mechanism is triggered by joystick or push button. Can be operated effectively by just one person – and is ideal for selective special collections, e.g.

of forgotten bins, in streets with reversing restrictions or on market squares. Plus: A fold-down guide flap also enables convenient manual insertion. Ideal in combination with the MICRO XL rear-end loader, for example.
