

EPSILON 2600

THE HIGH PERFORMER

ADVANTAGES

Fully electric drive
via two 24 volt
synchronous motors

Energy saving due
to increased efficiency
of the driver unit

DIN-mounting on
customized swivel
hinged door

Optimised bin emptying
thanks to active
container retention

ABOUT THE EPSILON 2600

The all-electric, split 24V automatic lifter has an innovative drive concept for closed discharge with maximum performance. It enables particularly low-dust, low-noise and container-friendly emptying. Thanks to the DIN interface, it can be used on different vehicle technologies

without any special preparation. Another plus: potential energy savings of up to 70 % compared to a conventional hydraulic lifter and therefore an increased range in conjunction with battery-electric or fuel driven chassis. Ideal for: 1-man operation with two separate

swivelling units in residential and commercial areas with high container density.

SERIES OPTIONS

BASIC CONSTRUCTION:

- Telescopic lifting carriage for greater ground clearance and container-friendly support
- Automatic detection and changeover to four-wheel containers
- Compatible with vehicle width 2350 mm and 2500 mm

COMPLEMENTED BY SAFETY & ASSISTANCE SYSTEMS:

- Worker Protection System
