

# Certificate

100% Green Energy with RenewablePLUS

CERTIFICATE NO.: 2025 – 780 – 026

This certificate confirms that the electricity comes from renewable energy sources. The origin of the electricity is clearly traceable and meets the requirements of the RenewablePLUS green electricity label

**Certificate for:**  
Zöller-Kipper GmbH

**On behalf of:**  
Stadtwerke Troisdorf GmbH

**Deliveries in the amount of:**  
894 MWh

**In the period from:**  
01.01.2025 - 31.12.2025

This TÜV quality guarantees beside the following:

- **Investment in new plants:** The operators/owners of the power plants engage in the expansion of renewable energy. They either invest in completely new facilities, into the expansion and extension of existing facilities or into environmental measures. These investments surpass the sum of the sale of the respective Guarantees of Origin.
- **Sustainability:** Support for climate protection projects with positive ecological and social impacts according to the EcoPLUS standard to save elsewhere the amount of CO<sub>2</sub> emissions emitted from electricity generation (both construction and operation).
- **Simultaneity on a monthly basis:** The respective electricity from renewable energy sources is generated simultaneously on the basis of monthly accounts.

Compliance with the sustainability criteria mentioned above is reviewed and certified annually by TÜV Rheinland Energy GmbH. The electricity, produced from green renewable sources in Europe, is fed into the interconnected European grid. The certificates used are issued as Guarantees of Origin (GoOs) according to the international standard of the European Energy Certificate System (EECS).
