

MINI XL

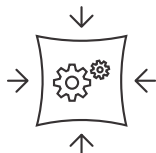

THE LARGEST AMONG THE SMALL

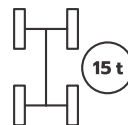

ADVANTAGES

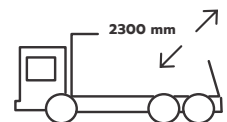

Small turning circle /
great manoeuvrability

Maximum functionality
and robustness in
a compact design

Suitable for two-axle
chassis from 15 tonnes
gross vehicle weight

Body width:
2300 mm

ABOUT THE MINI XL

The compact body with a volume of 12 to 18 m³ is ideal for light two-axle chassis starting from 15 tonnes gross vehicle weight. This makes the largest of the small particularly

suitable for waste collection in inner-city areas with narrow access roads and low passageways. Optionally available: a swivelling door for high-level lifters.
