

ROTARY 2406

THE LITTLE ONE SHOWS GREATNESS

ADVANTAGES

Split automatic lifter
with comb holder

Rotary movement via
swivel drive

Active container
retention

Short cycle times
of 6-8 seconds

ABOUT THE ROTARY 2406

It is a perfect fit – because we developed the Rotary 2406 especially for our mini series. The lifter is only slightly narrower than the Rotary 2418, otherwise it is a split automatic lifter, just like its big brother, with two independently operating lifting and tipping

units with screwed-on lifting comb for two 2-wheel containers and it is low-level compliant. Also suitable for 1-man emptying. Ideal for residential and commercial areas.

SERIES OPTIONS

BASIC CONSTRUCTION:

- Manually folding slide
- Barrier versions: Air barrier / mechanically horizontal folding barriers
- Continuous container stop
- Sensory workspace monitoring
