

MINI

The versatile vehicle – Refuse collection vehicles of MINI line

 **ZOELLER**
KIRCHHOFF GROUP

Refuse collection vehicles of **MINI** line

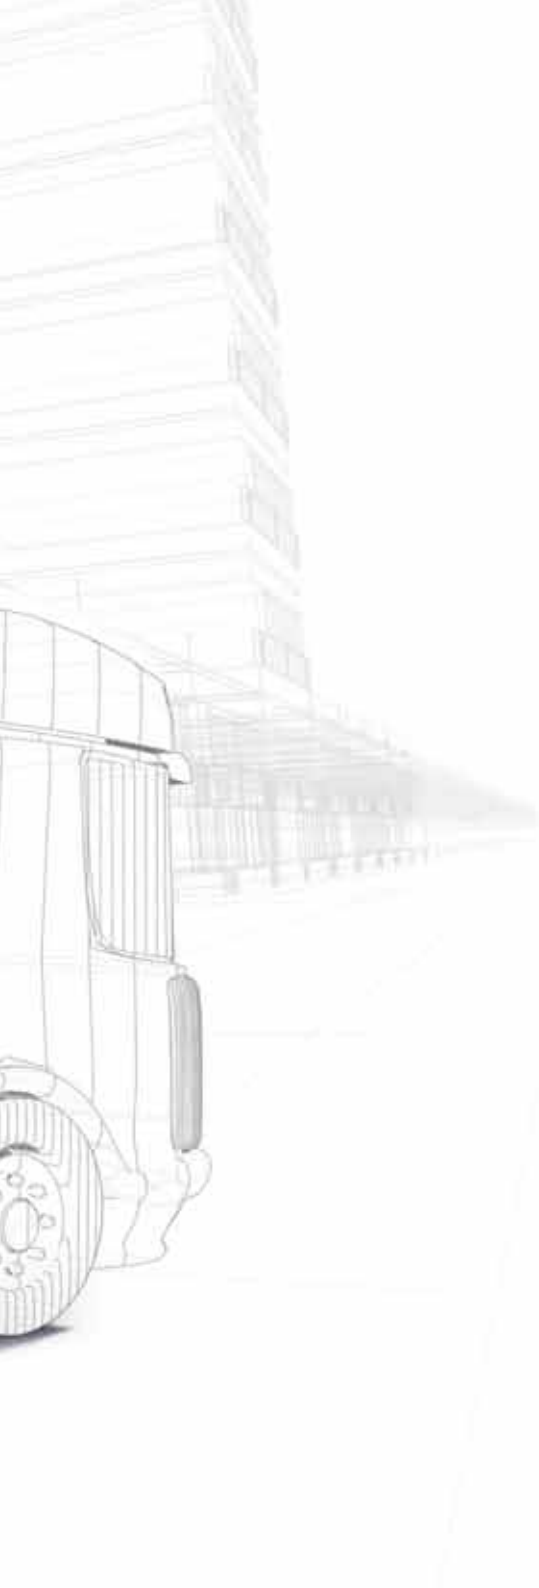

Features

- Width 2.15 m, 2.30 m
- Robust, low-maintenance compaction unit
- Completely welded body
- Highly wear-resistant materials
- Hydraulic tailgate locking
- External compactor cylinder

Advantages

- Wide range of application
- Optimum axle load distribution
- Good manoeuvrability
- High payload
- Easy operation of CAN-BUS control

MINI – the easily manoeuvrable model

A 8-10 m³-refuse collection body as rear loader for light chassis versions, 12 t.

Area of application:

Collection of bins and containers: all types of waste in inner-city and rural areas, as well as collection in old-town quarters. Open loading: on market squares and on cemeteries.

MINI XL – the compact model

A 9-12 m³-refuse collection body as rear loader for light chassis versions, 15 t.

Area of application:

Collection of bins and containers: all types of waste in inner-city and rural areas, as well as collection in old-town quarters. Open loading: on market squares and on cemeteries.

MINI XLH – the most versatile model

A 10-15 m³-refuse collection body as rear loader for light chassis versions, 18 t.

Area of application:

Collection of bins and containers: all types of waste in inner-city and rural areas.

Technik entscheidet

Technical innovations and pursuit of high quality for maximum lifetime made ZOELLER the largest manufacturer of hydraulic lifter systems for waste disposal.

Five technically fully perfected platforms, DELTA, ROTARY, GAMMA, OMEGA and MEGA are the basis for a large variety of customer-oriented lifters. ZOELLER, as integrated supplier of rear-end refuse collection vehicles, offers a unique range of body versions from 2 to 31 m³ on the basis of the product lines MICRO, MINI, MEDIUM and MAGNUM. The portfolio is completed by side loaders and inter-changeable systems in various designs as well as by special vehicles.

ZOELLER guarantees on the basis of its platform strategy production on schedule and of highest quality and absolute flexibility for individual customer requirements.

ZOELLER stands for solidity, long life, availability, technically mature ergonomics as well as occupational safety, cost-effectiveness, internationality and technical innovation.

ZOELLER High-level lifter for closed refuse collection in residential and industrial areas

1. The high-performance DELTA:
The lifter system with best performance

ZOELLER Low-level lifter for open refuse collection in residential and industrial areas

2. The compact ROTARY:
Lifter systems for variable refuse collection
3. GAMMA:
Lifter systems for individual refuse collection
4. The comfortable OMEGA:
High functionality in solid construction

ZOELLER Trade lifter for emptying of large containers and collection of industrial waste

5. The all-rounder MEGA:
Well-engineered skip-container lifter systems for universal use
